Subject: Final Record of Decision and Response to Illinois EPA Comments
Signature Pages and Electronic Deliverable
Site 7 RTC Silk Screen Shop
Naval Training Center Great Lakes
Great Lakes, Illinois

Dear Mr. Robinson:

Please find attached one copy of the signature page (title page) and page 1-1 and 1-2 (the authorizing signatures page) for the subject report and one compact disc (CD) of the electronic deliverable of the Site 7 Quality Assurance Project Plan, Remedial Investigation and Risk Assessment, Proposed Plan, and Record of Decision reports provided in .pdf format. Copies have also been distributed as indicated below.

If you have any questions, please call Aaron Bernhardt at 412-921-8433 or me at 412-921-7251.

Sincerely,

Robert F. Davis, P.E.
Task Order Manager

LESLIE MORROW
RISK ASSESSOR
ILLINOIS EPA

RECEIVED
JUN 02 2003

ILPA-ECL-FGRS

1.0 DECLARATION

1.1 SITE NAME AND LOCATION

Site 7 is the Silk Screening Shop and former Aboveground Storage Tank (AST) area associated with the Recruit Training Center (RTC) at Naval Training Center (NTC) Great Lakes located in Great Lakes, Illinois.

1.2 STATEMENT OF BASIS AND PURPOSE

This Decision Document presents the selected remedy for Site 7, RTC Silk Screening Shop and Former AST Area, located at NTC Great Lakes, Great Lakes, Illinois. The Decision Document was developed in accordance with the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) as amended by the Superfund Amendments and Reauthorization Act (SARA).

The Illinois Environmental Protection Agency (Illinois EPA) concur with the selected remedy.

1.3 ASSESSMENT OF THE SITE

Based on a Remedial Investigation/Risk Assessment (RI/RA) evaluation of current conditions and a removal action for polynuclear aromatic hydrocarbons (PAH)-contaminated soil, no pathways pose a threat to human health or the environment.

1.4 DESCRIPTION OF THE SELECTED REMEDY

No CERCLA remedial action is necessary for Site 7. Therefore, the selected remedy for the site is no further action. This involves taking no measures to address the environmental media at Site 7, including no further investigation or remediation.

1.5 STATUTORY DETERMINATIONS

An interim remedial action, i.e., a hot spot removal (excavation and off site disposal) of PAH-contaminated soil, was conducted in July 2002 (TtNUS, 2003). As a consequence of these remedial activities, no unacceptable risks are associated with the site, and, therefore, no further remedial action is necessary and no five- year reviews will be required.
